Applications

Single channel emergency stop circuit

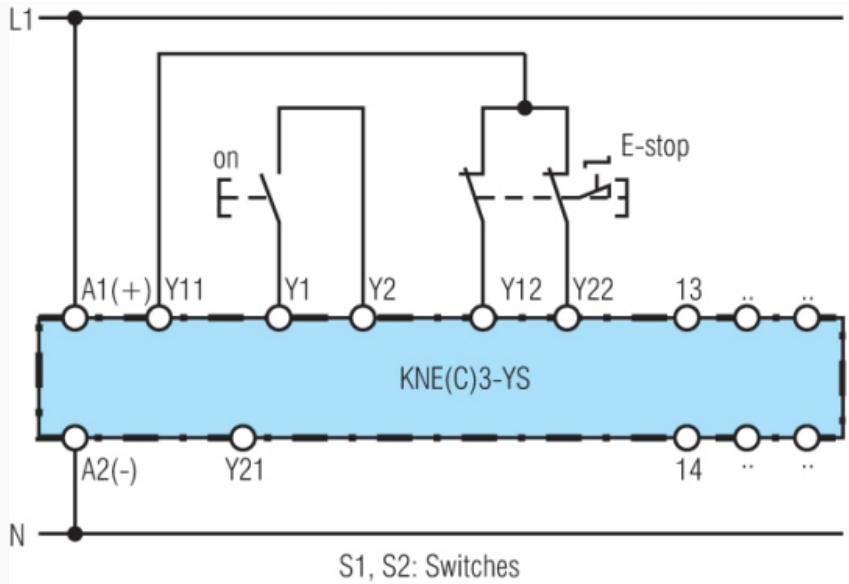

S1, S2: Switches

This circuit does not have any redundancy in the emergency-stop control circuit. S1 : no cross fault detection S2 : automatic start

Applications

2-channel emergency stop circuit without cross fault monitoring

S1 : no cross fault detection S2 : manual start

Applications

Contact reinforcement by external contactors controlled by one contact path

S1 : no cross fault detection S2 : automatic start

Applications

2-channel safety gate monitoring

S1 : no cross fault detection S2 : manual start

Applications

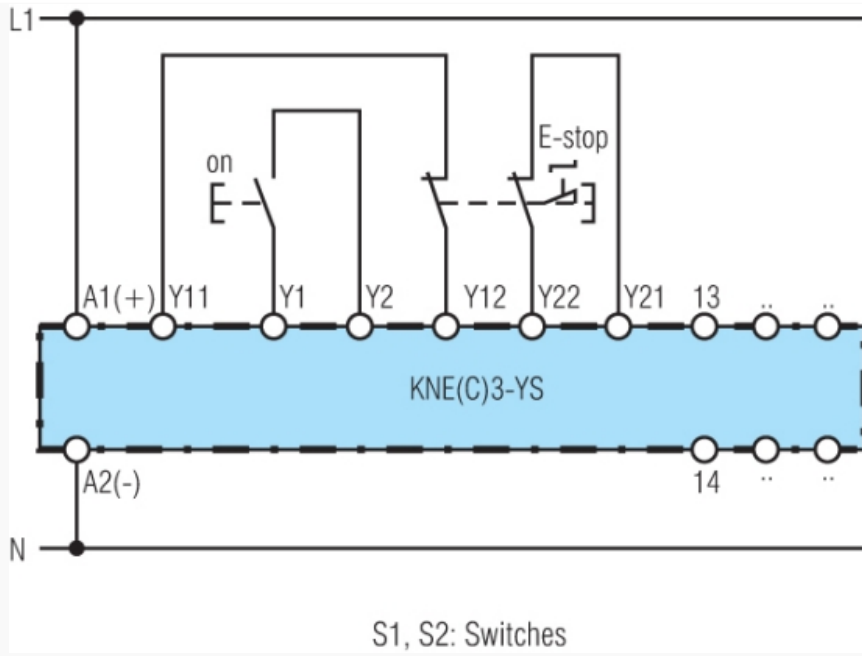

Contact reinforcement by external contactors, 2-channel controlled

For currents > 8 A, the output contacts can be reinforced by external contactors. Functioning of the external contactors is monitored by looping the NC contacts into the start circuit (Y1-Y2)

Applications

2-channel emergency stop circuit with cross fault monitoring

S1 : cross fault detection S2 : manual start
