

# TLP3543

## 1. Applications

- Mechanical relay replacements
- Security Systems
- Measuring Equipments
- Factory Automation (FA)
- Amusement Equipments

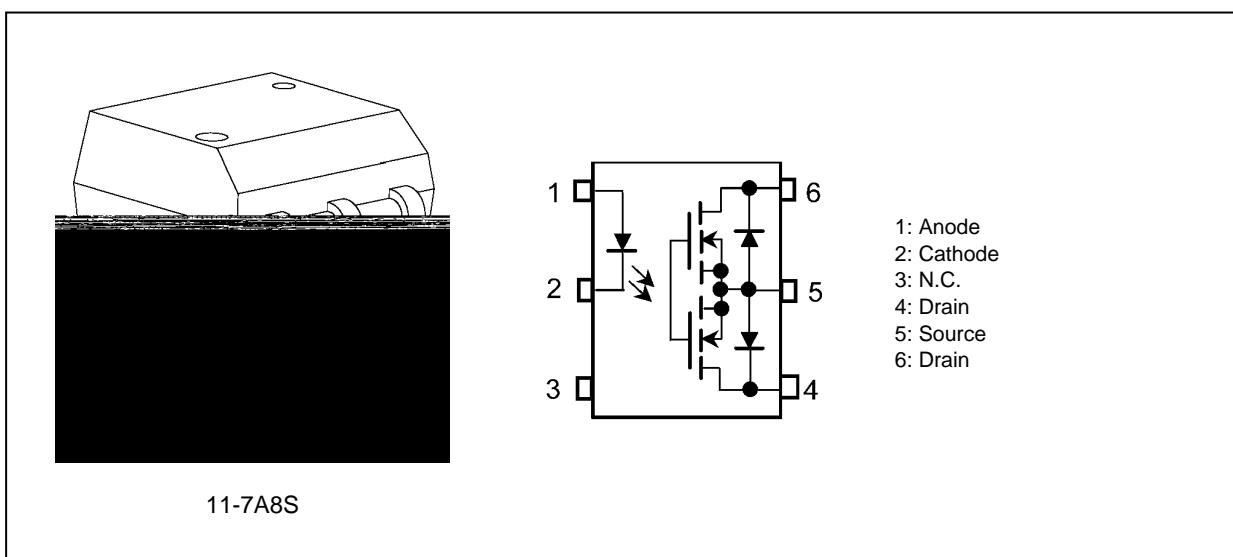

## 2. General

The TLP3543 photorelay consists of a photo MOSFET optically coupled to an infrared light emitting diode. It is housed in a 6-pin DIP package. The low ON-state resistance and the high permissible ON-state current of the TLP3543 make it suitable for power line control applications.
